Abstracts of the Second Annual Meeting of the Japan Neuroscience Society, Tokyo, Japan, January 28, 29, 1979

ORGANIZING COMMITTEE
Chairman: **Masao Ito**
Members: **Katsumi Otani, Masanori Otsuka, Masazumi Kawakami, Hiroshi Shimazu, Hiroshi Kawamura, Jinichi Nagumo, Akira Watanabe, Haruo Matsuyama, Yoshiaki Iwamura, Kunihiko Obata, Akimichi Kaneko, Keisuke Toyama**

(Neuroscience Letters Supplement 2, S1-S58, 1979)

1979 58 pages US $7.50/Dfl. 15.00

Recording the proceedings of the Second Annual Meeting of the Japan Neuroscience Society held this year, this collection of abstracts reflects the rapid progress being achieved in Japanese neuroscience today. More than 100 papers on all aspects of the neurosciences are presented with particular emphasis on research relating to neuropeptides, hypothalamus, cerebellum and the visual system. The topics are approached from a variety of disciplinary viewpoints, thus rendering the collection invaluable as a comprehensive overview of the subject.

At a time when the frontiers of Japanese neuroscience are rapidly expanding, this collection should be welcomed as a pertinent and timely contribution to neuroscience research world-wide, and hence read with interest by anyone wishing to keep up with latest developments.

Contents

I. Neurons and receptors
II. Synapses and transmitters
III. Development and regeneration
IV. Methods and theories
V. Spinal cord
VI. Brainstem
VII. Vestibular system and eye movements
VIII. Cerebellum and basal ganglia
IX. Visual and auditory systems
X. Telencephalon
XI. Hypothalamus
XII. Sleep

Abstracts of the Third European Neuroscience Meeting, Rome, Italy, September 11-14, 1979

Sponsored by the European Neuroscience Association

(Neuroscience Letters Supplement, 3 (1979) S1-S380)

1979 392 pages US $29.25/£13.75

Recording the proceedings of the Third European Neuroscience Meeting held in Rome, this collection of abstracts represents the most up-to-date and authoritative definition of the 'state of the art' of european neuroscience today. Covering major aspects of the field, the interdisciplinary approach to the subject ensures that this publication will be of paramount importance to anyone wishing to keep abreast of developments in the area.
The following contents reflect the broad scope of the collection:

Abstracts

Audition
Axoplasmic transport
Central autonomic control
Development, regeneration and trophic factors
Drives and motivation
Epilepsy
Experimental and clinical neurology
Information processing
Limbic system
Membrane biophysics
Memory and learning
Motor system I: Spinal-cord and proprioceptors
Motor system II: Oculomotor control
Motor system III: Higher motor centres
Motor system IV: Cerebellum
Neuroanatomical tracing
Neurochemistry
Neurocytology
Neurobiology of aging
Neuroendocrinology
Neuro-immunology
Neurological basis of addiction
Neuropetides I
Neuropetides II: Endorphins and enkephalins
Neuropsychology
Neuro-toxicology
Neurotransmitters I: Amino acids
Neurotransmitters II: Monoamines
a. Morphology and distribution
Neurotransmitters II: Monoamines
b. Uptake, synthesis and release
Neurotransmitters II: Monoamines
c. Behavioural pharmacology
Neurotransmitters III: Receptors
a. Biophysics
Neurotransmitters III: Receptors
b. Biochemistry
Pain
Sleep and biological rhythms
Somatosensory
Vestibular system
Visual system I: Retina
Visual system II: Neurophysiology
Visual system III: Development
Visual system IV: Behaviour and psychology

Symposia

Formation and maintenance of neuronal connections
Negative feed back by inhibition from axon collaterals
Regulation of neurotransmitter receptor sensitivity
Sleep

Communications workshops

Anatomy and physiology of intrinsic retinal circuits
Central actions of neuropeptides
Growth and trophic factors
Mechanism and humoural control of epilepsy
Neuronal tracing methods and their combination
Neurotransmitter release: Properties and control
Oculomotor control mechanisms
Properties of receptive fields in the visual system
Receptors for neurotransmitters:
Characterization, localization and function
Reorganization of neuronal circuits
Author index

To receive your copy of this unique publication, up till now only available to subscribers of NEUROSCIENCE LETTERS, send your order to:
Elsevier/North-Holland Scientific Publishers Ltd. P.O. Box 85, Limerick, Ireland.

NEUROSCIENCE LETTERS
Publication Schedule and Subscription Information:
1980 Volumes 15 - 20 in 18 issues. Subscription Price: US $ 348.000 including postage

Except in the U.S.A. and Canada orders should be sent to the above address.

In the U.S.A. and Canada orders should be sent to:
